EXPERIENCE

Analyst, Rotational Development Associate (Software Eng.) July 2024 – Present

Northern Trust · Limerick, Ireland

- Asset Servicing [Transfer Agency | CapMkts - Global Securities Finance]: backend microservices for multi-currency/time-zone fund & investor management; proposed a caching fix, adopted by the team to restore reliable usage metrics on GA. Migrated a GSL app from cloud foundry to Azure → FE/BE progressed to UAT.

Java · Spring Boot · Snowflake · Kubernetes · React · TypeScript · PCF/Azure SWA/AKS

- Asset Management [GenAI Research]: Contributed on the team's first live GenAI investor call transcription tool on Azure to extract key themes & market insights.

Python · React · Databricks · Azure · OpenAI API

Security, Meta Data Center

Jan 2024 – June 2024

Securitas · Dublin, Ireland

- Maintained documentation; identified security gaps across the facility and proposed enhancements
- Responded to critical events & alarms at direction of Control Room

Technical Support Specialist

July 2020 – Sept 2022

Accenture · Dublin, Ireland

- Troubleshoot and resolved technical issues for YouTube clients
- Escalated issues meeting SLA targets; proficient on client platform

Front-End Developer (Intern)

May 2022 – June 2022

Brainnest · Remote, Germany

- Created real, business-oriented client websites

Support Engineer (Intern)

Feb 2022 – Apr 2022

Valeo · Galway, Ireland

- Supported Process & Methods Engineers; production support (TRP & TLR targets)

PROJECTS

Machine Learning in Chronic Disease Prediction — Research

2026

github.com/AbduldevLab/ml_pred_chronic_disease

- Preprocessed ~41M data points across 6 TILDA datasets; handled missing data, time-varying covariates and class imbalance
- Trained Logistic Regression, Multilayer Perceptron, Random Forest & XGBoost; pooled multi-wave XGBoost achieved 0.718 AUC — 22% gain over single-wave baseline (0.589), variance reduced 10×
- Reduced to top-20 features via SelectKBest; SHAP beeswarm plots identified medication use, pain & self-rated health as primary chronic disease predictors

Python · LaTeX · XGBoost · scikit-learn · Pandas · TILDA dataset

Weather Forecast Web App

2024

github.com/AbduldevLab/NT-Weather-WebApp

- Built a live weather forecasting app with location-based lookup, 5-day forecasts, and real-time temperature, humidity & wind data via OpenWeatherMap API

React · Vite · TypeScript · OpenWeatherMap API

Kake Dessert Delivery — Final Year Project

2023

github.com/AbduldevLab/KakeDessertDelivery-FYP

- Designed and built full stack app end-to-end for a real startup client, from requirements through to deployment
- Implemented real-time Firestore DB with private routing, role-based auth, and a full ordering system

React · TypeScript · Firebase · Firestore · GitHub

TECHNICAL SKILLS

- ❑ **Front-end:** React · TypeScript · JS · HTML · CSS
- ❑ **Back-end:** Java · Spring Boot · Node.js
- ❑ **AI & Data:** Python · XGBoost · scikit-learn · Pandas
- ❑ **Cloud:** Azure · Snowflake · Firebase · GitHub Actions
- ❑ **Other:** C# · PostgreSQL · Git · Databricks · CI/CD

EDUCATION

MSc — Artificial Intelligence

University of Limerick · 2024 – 2026

Grade: 1:1 · Thesis: 70+% (Predicted)

Wolves Clubs & Societies: ISOC

BSc (Hons) — CS & Software Eng.

Maynooth University · 2019 – 2023

Grade: 2:1 · FYP: 82%

MU Life: ISOC · CS Society · African Society
